We are Hiring

BURSA MALAYSIA

Assistant Vice President, Java (Equity Post Trade)

Job Purpose

The role functions as tech lead to assist the Vice President of Software Development to handle the production issues and project delivery that has multiple projects running concurrently. The role is expected to be the second person in charge for the Vice President therefore the candidate is expected to be senior and experienced on top of developer role.

Key Responsibilities

Project Delivery

- Represent Group Technology as Technical Lead in the project charter of the business user projects.
- Provide technical inputs and solutions to the project team.
- Work across internal GT teams including operations/infra/security teams as single point contact from GT
- Lead the technical discussions with the vendors and review the estimates and delivery from the vendor

Application Support and Troublehooting

- Lead the production issue troubleshooting when the incidents reported.
- Work with internal GT teams and the vendors to recover the production as soon as possible.
- Provide workarounds, hot fixes or permanent solutions.
- Provide the technical details of the root cause and propose the preventive actions for improvements.

Application Development and Maintenance

- The role is still expected to develop the software and being hands-on as other developers based on the bandwith.
- This includes coding, testing, production check-ins and document updates such as Technical Architecture Diagram.
- Lead and guide other junior developers.

Application Improvement

- Identify the areas for improvement and enhancement on existing software applications.
- Perform code refactoring when applicable.
- Promote automation to reduce overhead.

Job Requirements

- Bachelor's degree in Computer Science or equivalent qualification and experience.

- Minimum 12 years of experience in software development.

- Knowledge in Malaysian Capital Market (equities, derivatives, fixed income and Islamic markets etc).

- Programming languages: Cobol, Microfocus, Shell Scripting, Database knowledge: DB2
