Co-Location Service

Maximize Opportunities With Increased Connectivity And Access

Overview

Bursa Malaysia offers all our customers the opportunity to co-locate their servers and equipment within Bursa Malaysia's physical data centre, enabling greater access to speed and liquidity of our Malaysian market. Through co-location, our clients can reduce latency and network complexity to enjoy reliable connectivity to the exchange data and services.

Eligible Clients

Exchange participants, information vendors, network service providers, and indepedent software vendors.

Services

Open interaction and increased connectivity in a highly resilient and secure environment.

24-hour turnaround time for installation of shared racks service.

Option to reserve contiguous rack space to cater for future expansion.

Temporary storage for equipment to be deployed for production.

Key Features

With a variety of connectivity options and market data to fit your organisation's needs and requirements, Bursa Malaysia's Co-Location services are a flexible and efficient service to complement your business performance.

Low latency connectivity to Bursa Malaysia's trading systems enabling your organisation to capitalize on speed.

Assured highly secure and access-controlled environment, including back up generators of at least 48 hours of continuous operation and round-the-clock surveillance by our in-house Auxiliary Police team.

Major Local Telco presence in the data centre environment.
