1.2 Profile

DanaInfra Nasional Berhad (“DanaInfra”) is a special purpose vehicle established on 3 March 2011 with the main purpose of undertaking the funding of infrastructure projects assigned by the GoM. DanaInfra has an authorised share capital of RM100 million consisting of 100 million shares of RM1.00 each of which RM10 million consisting of 10 million ordinary shares of RM1.00 each is issued and fully paid-up. All the issued and paid-up capital of DanaInfra, save for one (1) ordinary share owned by the Federal Lands Commissioner are owned by the Minister of Finance, Incorporated.

1.3 Financial Information

For information on DanaInfra’s audited financial statement for the financial period ended 30 June 2012, please view DanaInfra’s website at www.danainfra.com.my.

1.4 Mass Rapid Transit Project (“MRT Project”)

Mass Rapid Transit (“MRT”) is a proposed three-line Mass Rapid Transit system in Klang Valley/ Kuala Lumpur. It is identified as the newest addition to the urban rail system to the Klang Valley. Under the regional Greater Kuala Lumpur / Klang Valley – Land Public Transport Master Plan, the MRT system is one of the key railway systems which will become the back-bone of the regional public transport system. The first line of this project is the Sungai Buloh – Kajang Line (“SBK Line”), which stretches 51 kilometres with 31 stations whilst the preferred alignment for line 2 and 3 are to be determined in 2013. The aforementioned 3 new MRT lines under the Urban Rail Development Plan (“URDP”) will expand the existing coverage of rail based system by KTM Komuters, Light Rail Transit (“LRT”), Monorail and the Express Rail Link (“ERL”).

Currently, Klang Valley has a shortage of rail-based public transport coverage compared with most public transport-oriented cities. It has less than 20 kilometres of rail per million population. Public transport-oriented cities such as Singapore, Hong Kong and London have more than 40 kilometres of rail per million population. With the MRT, it will boost the rail-based public transport coverage in Klang Valley significantly and thereby alleviate traffic congestion by increasing the number of people using public transport. The MRT will enable easier connectivity between populated residential districts, business centres, commercial centres and key employment areas in the Klang Valley.

Additionally, the MRT will increase commercial activities. With improved connectivity in the Klang Valley, the MRT will draw more commuters to the city centre business districts as it will be integrated with commercial activities. The underground stations will also have good linkages with shopping centres. For more updated information on MRT Project, kindly refer to www.mymrt.com.my.

Section 2

DanaInfra Retail Sukuk

This page is intentionally left blank

2.1 General

The complete set of the principal terms and conditions of DanaInfra Retail Sukuk are available at www.danainfra.com.my. The salient terms and conditions of DanaInfra Retail Sukuk are summarised as follows:

	<i>Description</i>
Issuer	DanaInfra Nasional Berhad
Guarantor	GoM
Offer Size	Up to RM100 million in nominal value
Use of Proceeds	To finance the capital expenditure and operating expenses in relation to the development of the MRT Project
Face Value	RM100 per unit of DanaInfra Retail Sukuk
Maturity Date	Fifteenth (15 th) anniversary of the Issue Date
Profit Payment Frequency	Semi-annual
First coupon / profit date payment	6 months from the Issue Date
Coupon / Profit Rate	4.58% per annum
Listing	Bursa Malaysia under the 'Loans and Bonds' Board
Minimum Amount	Minimum subscription of 10 units or RM1,000
Maximum Amount	No limit
How to Buy	Via application forms or Internet Banking or Automated Teller Machine ("ATM") of the Participating Financial Institutions

2.2 Key Benefits of DanaInfra Retail Sukuk

The key benefits of DanaInfra Retail Sukuk are outlined as follows:

- Provides investors an opportunity to diversify their investment portfolio
- Profit Payment is guaranteed by the GoM
- Payment of principal / Face Value at maturity is guaranteed by the GoM
- Fixed semi-annual Profit Payment Amount
- DanaInfra Retail Sukuk will be quoted and tradable on Bursa Malaysia
- DanaInfra Retail Sukuk is an approved Shariah-compliant investment

2.3 Key Risks of DanaInfra Retail Sukuk

The key risks of DanaInfra Retail Sukuk are tabulated below:

	<i>Description</i>
Credit risk	Credit risk refers to the ability of DanaInfra to make timely payments of the Profit and Face Value. DanaInfra Retail Sukuk has low credit risk as the payment of Profit and Face Value at maturity is guaranteed by the GoM.
Market risk on payment of Face Value	Similar to other fixed-income investments, market risks arise as the value of DanaInfra Retail Sukuk is subject to market conditions specifically interest rate movements. The payment of principal / Face Value is guaranteed by the GoM. If an investor decides to sell its holding of DanaInfra Retail Sukuk prior to its maturity, the investor may enjoy gains or suffer losses on his / her investment, depending on the selling price. The price of DanaInfra Retail Sukuk has an inverse relationship with the movement of interest rates. When interest rate rises, the price will fall and vice versa.
Project risk	The MRT project is inherently subject to the project risks attached to it. However, irrespective of the outcome of the project, the holders of DanaInfra Retail Sukuk are assured of the payment of Profit and Face Value at maturity since the instrument is guaranteed by the GoM.
Liquidity risk	DanaInfra Retail Sukuk will be listed and traded on Bursa Malaysia. Being a relatively new product for the public, it may take some time for the sukuk to be actively traded. Nevertheless, the exchange platform would facilitate the trading of the sukuk which contributes towards liquidity.

How to Apply

This page is intentionally left blank

3.1 How to Apply for the DanaInfra Retail Sukuk

Note: Kindly refer to DanaInfra's website at www.danainfra.com.my for further details on DanaInfra Retail Sukuk application

Appendix

This page is intentionally left blank

Case Studies

Daud is an investor who had invested RM100,000 in a 15-year DanaInfra Retail Sukuk. At the time of subscription, the Profit Rate of DanaInfra Retail Sukuk was 4.50% per annum and the initial price was RM100.

He can either:

- 1) Hold DanaInfra Retail Sukuk until maturity;
- 2) Sell DanaInfra Retail Sukuk in full / partial at a **premium** on a business day at anytime during the tenure; or
- 3) Sell DanaInfra Retail Sukuk in full / partial at a **discount** on a business day at anytime during the tenure.

Case Study 1 – Hold until maturity

If Daud invests in DanaInfra Retail Sukuk and holds them to maturity, his investment returns can be calculated as follows:

Semi-annual profit payment	=	RM100,000 x (4.50% / 2)
	=	RM2,250
Total profits	=	RM2,250 x (2 period per year x 15)
	=	RM67,500
Total investment proceeds	=	RM67,500 + RM100,000
	=	RM167,500
Investment rate of return (*)	=	Total profits / (Face Value x holding period)
(per annum)	=	RM67,500 / (RM100,000 x 15 years)
	=	4.50% per annum

Case Study 2 – Sell at a premium

If Daud sells his investment after a 90-day **holding period**, when the price has increased to RM103 from the initial price of RM100, his investment returns can be calculated as follows:

$$\begin{aligned} \text{Selling proceeds} &= \text{Face Value} \times (\text{Selling price} / \text{Initial price}) \\ &= \text{RM}100,000 \times (\text{RM}103 / \text{RM}100) \\ &= \text{RM}103,000 \end{aligned}$$

$$\begin{aligned} \text{Gain} &= \text{RM}103,000 - \text{RM}100,000 \\ &= \text{RM}3,000.00 \end{aligned}$$

$$\begin{aligned} \text{Investment rate of return (*)} &= \text{Gain} / (\text{Face Value} \times \text{holding period} / \text{number of days in a year}) \\ \text{(per annum)} &= \text{RM}3,000 / (\text{RM}100,000 \times (90 \text{ days} / 365 \text{ days})) \\ &= 12.17\% \text{ per annum} \end{aligned}$$

Case Study 3 – Sell at a discount

If Daud sells his investment after a 90-day **holding period**, when the price has decreased to RM98.00 from the initial price of RM100.00, his investment returns can be calculated as follows:

$$\begin{aligned} \text{Selling proceeds} &= \text{Face Value} \times (\text{Selling price} / \text{Initial price}) \\ &= \text{RM}100,000 \times (\text{RM}98 / \text{RM}100) \\ &= \text{RM}98,000 \end{aligned}$$

$$\begin{aligned} \text{Loss} &= \text{RM}98,000 - \text{RM}100,000 \\ &= -\text{RM}2,000 \end{aligned}$$

$$\begin{aligned} \text{Investment rate of return (*)} &= \text{Loss} / (\text{Face Value} \times \text{holding period} / \text{number of days in a year}) \\ \text{(per annum)} &= (-\text{RM}2,000) / (\text{RM}100,000 \times (90 \text{ days} / 365 \text{ days})) \\ &= -8.11\% \text{ per annum} \end{aligned}$$

Note : The above case studies are for illustration purposes only.

() : The investment rate of return has not taken into account transaction costs and time value of money*

Frequently Asked Questions

This page is intentionally left blank

Frequently Asked Questions

General

What is Danainfra Retail Sukuk?	Danainfra Retail Sukuk is an ETBS issued by Danainfra and guaranteed by the GoM.
Why was Danainfra Retail Sukuk created?	Danainfra Retail Sukuk is created as part of Danainfra's efforts to broaden its investor base by allowing participation by retail investors in funding the national infrastructure project i.e. the MRT Project, whilst diversifying their investment portfolio in the bond / sukuk market. The issuance of retail sukuk is also part of the initiatives under the Capital Market Masterplan 2 to facilitate greater retail participation in the bond and sukuk market and intended to make available a wider range of investment products to retail investors.
What would the proceeds of Danainfra Retail Sukuk be utilised for?	The proceeds of Danainfra Retail Sukuk will be utilised to finance the construction and development of the MRT Project.
What are the regulatory bodies governing the ETBS?	<p>The regulatory bodies governing the ETBS are Securities Commission and Bursa Malaysia.</p> <p>To obtain further information, kindly visit their respective websites as follows:</p> <ul style="list-style-type: none">▪ Securities Commission - www.sc.com.my▪ Bursa Malaysia - www.bursamalaysia.com
Is investment in Danainfra Retail Sukuk secured?	Yes, as Danainfra Retail Sukuk is guaranteed by the GoM.
Will Danainfra Retail Sukuk be rated?	Danainfra Retail Sukuk is not rated as it is guaranteed by the GoM.
Where can I get more information on the terms of Danainfra Retail Sukuk?	For more information on the terms, you may visit www.danainfra.com.my .
Who would this instrument / sukuk be suitable for?	Since it is a 15 year investment, it is suitable for investors who are looking for diversification into long term investment with guaranteed payment of Profit and Face Value at maturity.

DanaInfra Retail Sukuk is guaranteed by the GoM. Is that similar to how fixed deposits are guaranteed under Perbadanan Insurans Deposit Malaysia ("PIDM")?	PIDM insures up to RM250,000 worth of principal and profit for deposits with licensed financial institutions. The Profit Payments and Face Value under DanaInfra Retail Sukuk are fully guaranteed by the GoM.
What will be the size of the DanaInfra Retail Sukuk?	The issue size of the DanaInfra Retail Sukuk will be up to RM100 million in nominal value.
What is the tenure of the DanaInfra Retail Sukuk?	DanaInfra Retail Sukuk will have a tenure of 15 years.
Would DanaInfra be making more issuance of Retail Sukuk in the future?	It is the intention of DanaInfra to issue more Sukuk in the future to finance the MRT Project. In each issuance of the Sukuk, DanaInfra will offer up to 1/5 of the total issue size to the retail investors, if the Issuer deems appropriate at the time of issuance.
When is the offer period for DanaInfra Retail Sukuk's issuance?	The Opening Date of the Offer will be on 24 October 2013 and the Closing Date of the Offer will be 15 November 2013.
What will be the minimum and maximum amount of subscription?	The minimum subscription amount is RM1,000. There is no maximum limit for the subscription amount. Subscriptions will be in multiples of RM1,000.
What happens if DanaInfra Retail Sukuk is over-subscribed?	The Issuer will conduct a ballot to determine the allocation to retail investors in a fair and equitable manner.
How is the Profit Rate being determined?	The Profit Rate is determined at the close of the book building of the institutional offering based on the demand and the prevailing market interest rate.
Is DanaInfra Retail Sukuk Shariah-compliant?	Yes, DanaInfra Retail Sukuk is a Shariah-compliant investment. CIMB Islamic Bank Berhad as the Shariah adviser ("Shariah Adviser") has issued a Shariah pronouncement in respect of DanaInfra Sukuk and the related structure and mechanism and their compliance with Shariah principles.

Who shall pay for the transaction cost?	The retail investors will have to bear their respective transaction cost.

Holding the Investment

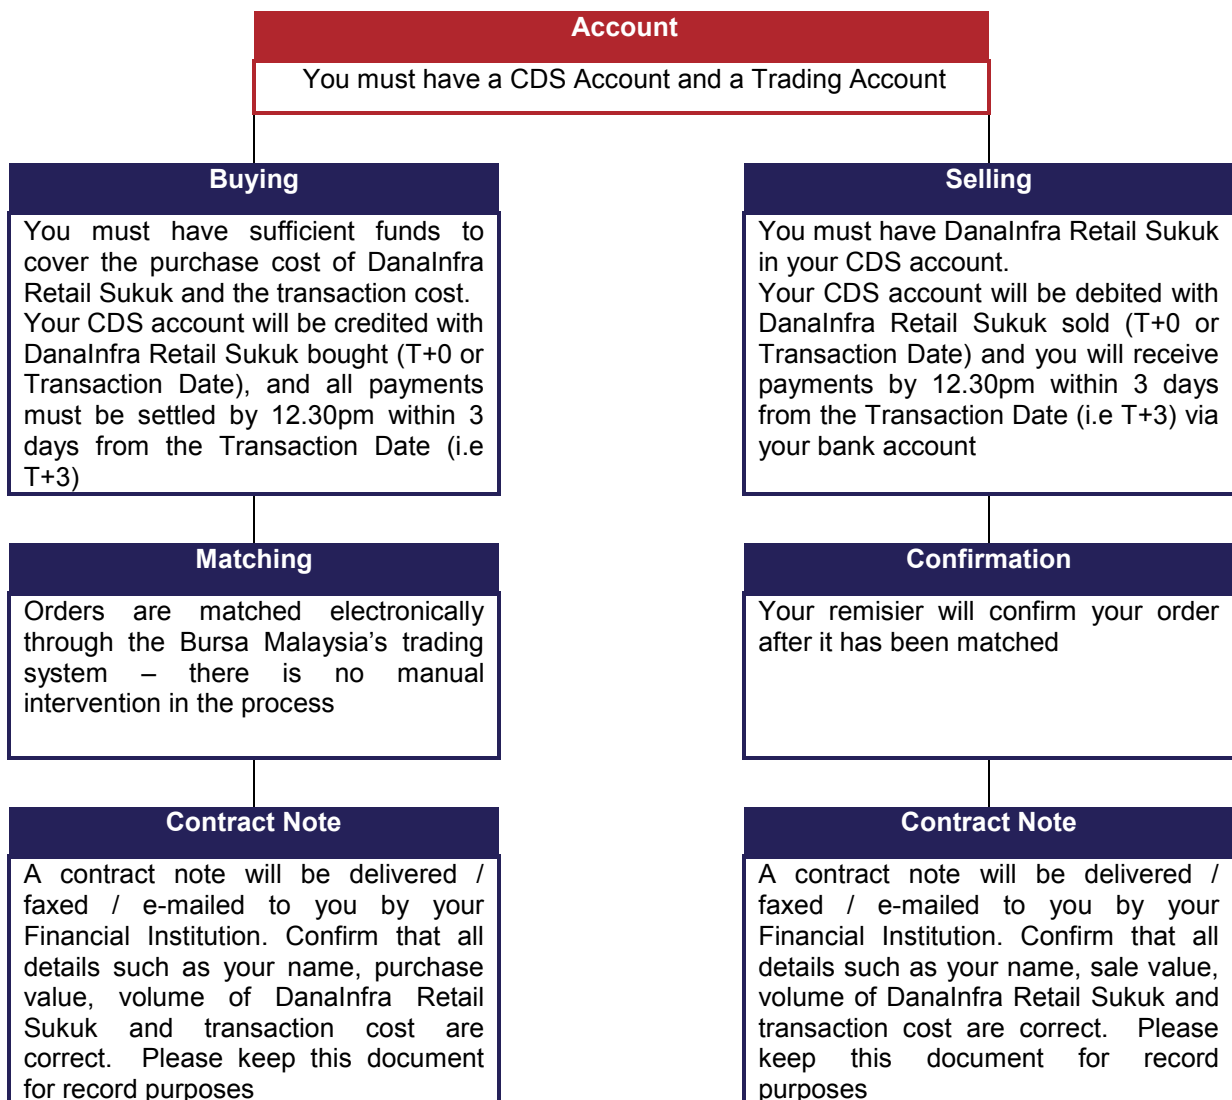

How often will Profit Payments be paid to the holders of Danalnfra Retail Sukuk?	The Profit Payments will be paid semi-annually.
When will Danalnfra Retail Sukuk be listed on Bursa Malaysia?	Danalnfra Retail Sukuk will be listed on Bursa Malaysia on 28 November 2013.
What are the trading hours for Danalnfra Retail Sukuk?	Trading hours for all instruments listed and traded on Bursa Malaysia on business days are as follows: Morning session : 9.00am to 12.30pm Afternoon session: 2.30pm to 5.00pm The same trading hours apply to Danalnfra Retail Sukuk.
What will happen to my investment in Danalnfra Retail Sukuk should the MRT project fail?	In this event, your investment will not be affected as the Profit Payments and Face Value of Danalnfra Retail Sukuk are fully guaranteed by the GoM, irrespective of the outcome of the MRT project.
How can the investors obtain the latest pricing of Danalnfra Retail Sukuk?	Latest pricing of Danalnfra Retail Sukuk can be obtained from Bursa Malaysia's website (www.bursamalaysia.com).
Will the Profit Rate fluctuate during the tenure of the Danalnfra Retail Sukuk?	No, as the Profit Rate per annum will be fixed throughout the tenure of Danalnfra Retail Sukuk.
What are the key differences between ETBS and shares?	The key differences are: <ol style="list-style-type: none"> 1. ETBS holders are essentially financiers of the company, while shareholders are owners of the company 2. ETBS holders' profits are at a fixed rate via steady periodic payments known as coupons / profits. Meanwhile, for shareholders, profits are termed as dividend payments of which are based on the company's performance and they are paid at the discretion of the company 3. Investment in ETBS would involve a fixed maturity period, while investment in shares do not have a maturity period.
What are the differences between ETBS and other retail investments such as unit trust?	Unit trust represents a pool of investments of a group of investors to invest in diversified portfolio of investments including bond / sukuk through fund managers. In ETBS, retail investors can directly invest in any retail bond / sukuk.
What are the factors affecting the yield and price of a bond / sukuk?	The factors affecting the yield and price of a bond / sukuk among others include the movement of market interest rate, demand and supply of the bond / sukuk, credit risk of the issuer and the level of inflation.

<p>How are the bond / sukuk prices quoted on the exchange? Does it take into account the periodic coupon / profit payments of the bond / sukuk?</p>	<p>At the point of issuance, prices quoted on the exchange will be RM100. The price will change due to movement in market interest rates, remaining period to maturity as well as accrual of coupon / profit payable for the period.</p> <p>Kindly refer to www.bondinfo.bnm.gov.my for further details on bonds / sukuk.</p>
<p>How will I get paid on the coupon / profit? Is it similar to stocks?</p>	<p>Coupon / profit payments will follow the current dividend payment setup for your trading account, either through electronic payment or cheque from the Issuer's paying agent.</p> <p>The Profit Payment will be credited directly into the bank account of the holders of DanaInfra Retail Sukuk as indicated in the CDS account.</p> <p>For those without details of bank account in the CDS account, a cheque will be mailed to the correspondence address maintained in the CDS account. Kindly refer to Bursa Malaysia's website at www.bursamalaysia.com for further details.</p>
<p>How is the coupon / profit payment calculated?</p>	<p>The coupon / profit payment is calculated using the following formula:</p> <p>Profit payable = Profit Rate ("PR") x Face Value ("FV") x (holding period / 365 days)</p> <p>Assumptions: PR : 4.50% per annum FV : RM1,000</p> <p>The calculation for annual coupon / profit payment may be illustrated as follows: = 4.50% x RM1,000 x (365 days / 365 days) = RM45.00</p> <p>Since coupon / profit is paid semi-annually, the coupon / profit payment per payment period is: = RM45.00 / (182 days / 365 days) = RM22.44</p> <p>Coupon / Profit will be paid to investors semi-annually until maturity.</p>
<p>How to calculate the value of bond / sukuk?</p>	<p>To calculate the value of your bond / sukuk, you can use the online bond / sukuk calculator available in Bursa Malaysia's website at www.bursamalaysia.com/etbs.</p>

<p>Is there any restriction to the holding period for the holders of Danalnfra Retail Sukuk?</p>	<p>There is no holding period. Holders of Danalnfra Retail Sukuk may sell his / her holding at any time from the date of listing, or choose to hold to maturity.</p>
<p>When is the right time for a retail sukuk holder to sell his / her holding?</p>	<p>At the time of issue of the sukuk, the profit rate and other conditions of the sukuk will have been influenced by a variety of factors, such as current market interest rates, the length of the tenor and the creditworthiness of the issuer.</p> <p>With the creditworthiness of the issuer backed by Government Guarantee, the factor that would likely change over time is the market interest rates.</p> <p>The market price of a sukuk is the present value of all expected future profit and principal payments of the bond discounted at the sukuk's redemption yield, or rate of return. That relationship is the definition of the redemption yield on the sukuk, which is likely to be close to the current market interest rate for other sukuk / bonds with similar characteristics. The yield and price of a sukuk are inversely related, hence, when market interest rates rise, sukuk prices fall and vice versa.</p> <p>As such when the market interest rate for other sukuk / bonds with similar characteristics falls below the yield of the sukuk held, the retail sukuk holder may sell his / her holding for a gain on the face value of the sukuk. At the point of sale, any profit accrued shall be paid by the purchaser to the seller.</p> <p>Please consult your professional financial adviser.</p>
<p>How is an ETBS different from the traditional bonds / sukuk transacted by institutions?</p>	<p>The ETBS offered to retail investors have the same characteristics as the bonds / sukuk distributed to institutional investors. The difference lies in the distribution platform for the primary issuance as well as the secondary trading whereby the ETBS are exchange-based while the traditional bonds / sukuk have been traded over the counter or ("OTC") amongst institutional investors.</p> <p>The other difference is in the lot size per transaction whereby ETBS transacted in lots of RM1,000 while institutional investors transact in lot sizes of RM5,000,000.</p>
<p>Can a retail sukuk holder sell his / her holding to an institutional investor?</p>	<p>There is no limitation to whom a retail sukuk holder may sell his/her holdings to. However, institutional investors would normally purchase sukuk in RM5,000,000 lot sizes.</p> <p>This is where the exchange becomes the intermediary to bridge the connectivity between the retail and institutional investors. Banks may act as intermediaries to acquire the retail lots that are being sold to the exchange by retail investors.</p> <p>These retail lots held by banks may then be 1) held either as stockpile to sell to other retail investors wishing to acquire retail sukuk on the secondary market through the exchange, or 2) be bunched up into lot</p>

	<p>sizes of RM5,000,000 to be sold to institutional investors through the OTC platform.</p> <p>The reverse may also happen whereby institutional sukuk holders may offer their holdings to retail investors via the exchange. The banks may again act as intermediaries by acquiring the RM5,000,000 OTC lots and breaking them down for distribution in the RM1,000 retail lots.</p>
How do investors trade Danalnfra Retail Sukuk?	Please refer to the chart below.

How to Trade Danalnfra Retail Sukuk

Selected Branches of AmBank (M) Berhad

MRT Project

What is the MRT?	<p>It is a proposed three-line Mass Rapid Transit system in Klang Valley/ Kuala Lumpur. The project was announced in December 2010 by the GoM, and was launched by Prime Minister Y.A.B Dato' Sri Mohd Najib bin Tun Abdul Razak on 8 July 2011.</p> <p>The MRT will be integrated with the LRT, Monorail, KTM Komuter and intra/ inter-city buses and will help alleviate traffic congestion by increasing the number of people using public transport in the city centre. When operational, the system targets to carry up to 400,000 commuters daily.</p> <p>The first line of this project is the Sungai Buloh – Kajang Line (“SBK Line”), which stretches 51 kilometres with 31 stations.</p> <p>Works on the MRT SBK line has begun since July 2011 and the Project is expected to be completed by 2017.</p>
Why do we need the MRT?	<p>It is estimated by 2020 the population in the Klang Valley will grow from the current 6 million to 10 million. In view of this, if every single trip is made on private transport, the roads in Klang Valley will be at a gridlock. A sustainable transportation system is therefore needed where huge number of people can travel efficiently.</p> <p>Rail-based public transport, such as the MRT, LRT or commuter train, have always form the backbone of a city's public transport system as it can carry large numbers of people and can move people quickly because it is not hindered by road traffic.</p> <p>Klang Valley currently has a shortage of rail-based public transport coverage compared with most public transport-oriented cities less than 20 kilometres of rail per million population. Public transport-oriented cities such as Singapore, Hong Kong and London have more than 40 kilometres of rail per million population. With the MRT, it will boost the rail-based public transport coverage in Klang Valley significantly.</p>
What benefits will the MRT provide?	<p><u>Economic growth</u></p> <p>The MRT project will create more than 130,000 employment opportunities during its construction period and is expected to generate RM3 – 4 billion per annum worth of the Gross National Income (“GNI”) from construction and operations from 2011 to 2020.</p> <p>Additionally, RM8 - 12 billion per year will be generated based on a multiplier effect of 2.5-3.5 from construction.</p> <p>With the increase in productivity from better mobility in total, an average of RM24 billion GNI per year will be generated over the next 10 years.</p>

	<p><u><i>Boosting development and commercial activity</i></u></p> <p>The MRT will push property value up. The improved connectivity provided by the MRT will result in property value appreciation and an estimated increase of RM 300 million in gross development value.</p> <p>The MRT will also spur developments in four new areas:</p> <ul style="list-style-type: none"> ▪ Rubber Research Institute development in Sungai Buloh ▪ Warisan Merdeka ▪ Tun Razak Exchange (former KL International Financial District) ▪ Cochrane Development <p>Furthermore, the MRT will boost commercial activities. With the improved connectivity in Klang Valley, the MRT can draw more commuters to the city centre business districts.</p> <p>The underground stations will also have good linkages with shopping centres.</p>
<p>What facilities do MRT provide?</p>	<p>The MRT adopts the Universal Access Facilities. This means that the MRT stations will be universally accessible not only for people with disabilities but also to the elderly, pregnant women, parents with children in strollers, as well as those with luggage.</p> <p>The MRT stations and trains are holistically designed, ensuring the disabled can regularly and conveniently access public transportation.</p> <p>All MRT stations are designed with the following features:</p> <p><i>Entering the station</i></p> <ul style="list-style-type: none"> ▪ <i>Step-free (no steps for easy mobility)</i> ▪ <i>Covered walkways with tactile guide path to station entrance from station car park, nearest bus/ taxi stand and car drop-off area</i> ▪ <i>Chain and intercom connection with Customer Service Officer to communicate with station staff to unlock the parking bays and assist with parking</i> <p><i>Navigating inside the station</i></p> <ul style="list-style-type: none"> ▪ <i>LCD displays and public announcement system on public information and operational messages.</i> ▪ <i>Disabled-friendly lifts with intercom facilities</i> ▪ <i>Braille markings on lift control buttons</i> ▪ <i>Audible warning messages of escalators</i> ▪ <i>Lower handrails to stairs and ramps in public areas</i> <p><i>On the platform</i></p> <ul style="list-style-type: none"> ▪ <i>Non-slip tactile guide path and warning signs at station platform</i> ▪ <i>Perch steels by the lift</i>

	<ul style="list-style-type: none"> ▪ <i>Priority waiting areas at platform</i> ▪ <i>Target gap between platform edge and train of 50mm</i> <p><i>On the train</i></p> <ul style="list-style-type: none"> ▪ <i>Wheelchair spaces in train next to doors</i> ▪ <i>Dynamic route maps in trains</i> <p><i>Other services</i></p> <ul style="list-style-type: none"> ▪ <i>Helplines for passengers requiring assistance at lift lobbies and platforms</i> ▪ <i>Induction loop at Customer Service Centre</i> ▪ <i>Flashing lights in case of emergency for the hearing impaired</i> <p>Out of 31 stations, the 15 stations below will be equipped with Park n Ride facilities:</p> <ul style="list-style-type: none"> ▪ <i>Sungai Buloh</i> ▪ <i>Kota Damansara</i> ▪ <i>Taman Industri Sungai Buloh</i> ▪ <i>Taman Tun Dr Ismail</i> ▪ <i>Seksyen 16</i> ▪ <i>Pusat Bandar Damansara</i> ▪ <i>Maluri</i> ▪ <i>Taman Bukit Mewah</i> ▪ <i>Plaza Phoenix</i> ▪ <i>Taman Suntex</i> ▪ <i>Taman Cuepacs</i> ▪ <i>Bandar Tun Hussein Onn</i> ▪ <i>Taman Koperasi</i> ▪ <i>Saujana Impian</i> ▪ <i>Kajang</i>
<p>How will MRT Corp ensure the quality of the MRT project?</p>	<p>The construction methodologies, requirements and materials for the development of the MRT will conform to internationally-recognised best quality practices, standards and codes.</p> <p>The MRT Project will conform to the following codes:</p> <p><i>Environmental Management Plan</i></p> <p>Comprehensive mitigation and impact programmes such as Environmental Management Programme and Safety, Health & Environment Programme are implemented to control impacts such as noise, dust, vibration, hygiene and safety impacts among others during the construction of MRT.</p> <p><i>Traffic Management Plan</i></p> <p>During the construction of the MRT, efficient Traffic Management Plan (will be deployed to minimise inconvenience and disruption to the public. Well-designed plans managed by traffic experts and based on local authorities' guidelines are in place to protect and guide road users</p>

	<p>and pedestrians in passing through a MRT construction area safely. There will be temporary traffic diversions to facilitate the construction of the MRT.</p> <p>A dedicated 24-hour Emergency Response Team (“ERT”) with emergency response capabilities will also be set up by all work package contractors. The ERT will be on standby to handle urgent situations such as:</p> <ul style="list-style-type: none"> ▪ Accident response ▪ Vehicle breakdown response ▪ Minor road repairs ▪ Burst pipes and fallen trees ▪ Flash flood, ad-hoc detours and diversions
<p>How will SPAD supervise the MRT project?</p>	<p>Suruhanjaya Pengangkutan Awam Darat (“SPAD”)’s role is to ensure the planning, construction and operation of the line will follow all the necessary regulations and fulfill its ultimate objective of providing Klang Valley users with comfortable and efficient public transport system.</p> <p>SPAD functions include:</p> <ul style="list-style-type: none"> ▪ Exercise authority over corridors & alignment ▪ Study transportation demands ▪ Develop integrated master plan ▪ Approve railway schemes ▪ Interface with working agencies ▪ Administer land acquisitions <p>SPAD will monitor the MRT project to ensure it meets the above objectives via:</p> <ul style="list-style-type: none"> ▪ MRT Technical Committee monthly meetings with the following agenda: <ul style="list-style-type: none"> ○ Progress monitoring and tracking ○ Operational and technical decisions ○ Project issues resolution ▪ MRT Division’s main focus <ul style="list-style-type: none"> ○ Stakeholder management ○ Risk management and communication ○ Land acquisition process according to the Land Acquisition Act 1960 (Act 486) ○ Disbursements of land compensation to private landowners ○ Technical compliance with SPAD Act and regulations

Where can we obtain the Klang Valley Land Public Transport Master Plan and/or the Urban Rail Development Plan?

The Greater KL / Klang Valley (“GKLKV”) Land Public Transport Master Plan (“LPTMP”) and Urban Rail Development Plan (“URDP”) are available at SPAD’s website at www.spad.gov.my.

Where are the future MRT corridors (Lines 2 and 3)?

The corridors of the future two (2) MRT lines are captured in the URDP which constitutes one of the plans under the GKLKV regional LPTMP.

MRT2 - Circle Line	To cater for orbital movements around KL. To provide linkages to key major areas such as Mid Valley, Mont Kiara, Sentul Timur and Ampang, as well as proposed developments such as Malaysia External Trade Development Corporation.
MRT 3 - North-South Line	To cater for the North West corridor of future growth areas such as Sungai Buloh, Kepong and Selayang with the eastern half of the city centre (including Kampung Baru and the Tun Razak Exchange (“TRX”)).

The feasibility study for MRT Line 2 and Line 3 to identify the preferred alignment is expected to be completed by early 2013, and will also focus on optimising accessibility and connectivity to land public transport.

For more updated information on MRT Project, kindly refer to www.mymrt.com.my.
