SETTLEMENTS

The purpose of this section is to identify the model of settlement employed, the relationship between cash and securities, and the basis on which participants meet their obligations.

48. The Committee on Payment and Settlement Systems of the Bank for International Settlements (BIS) has identified three common structural approaches or models for linking delivery and payment in a securities settlement system. Please indicate which model your procedures most closely resemble (Please refer to details on the models within the "Help" section located below this question): (Choose all that apply.)

Model 2 - Gross Settlements of Securities Transfers Followed by Net Settlement of Funds Transfers. (please answer 48a)

48a. Please briefly describe your settlement process, including how your settlement procedures may vary from the model chosen above (and as described below in the Help section)?

Delivery and settlement of securities is performed through book entry share settlement at client level based on records maintained by the Depository. Financial settlement of securities is on a net basis in which the monetary obligations of the participants are pooled and off-set resulting in one final position for each participant on the settlement date. The participant shall settle the financial settlement through a designated account with a designated clearing bank appointed by the Clearing House.

Question 48 Help:

Model 1 - Gross, Simultaneous Settlements of Securities and Funds Transfers. These systems settle transfer instructions for both securities and funds simultaneously on a trade-by-trade (gross) basis, with final (irrevocable and unconditional) transfer of securities from the seller to the buyer (delivery) occurring at the same time as final transfer of funds from the buyer to the seller (payment). The securities settlement system maintains securities accounts and funds accounts for participants. Transfer of securities and cash are made by book-entry.

Model 2 - Gross Settlements of Securities Transfers Followed by Net Settlement of Funds Transfers. These systems settle securities transfer instructions on a trade-for-trade (gross) basis, with final transfer of securities from the seller to the buyer (delivery) occurring throughout the processing cycle, but settle funds transfer instruction on a net basis, with final transfer of funds from the buyer to the seller (payment) occurring at the end of the processing cycle.

The securities settlement system maintains securities accounts for participants, but funds accounts are usually held by another entity (often a commercial bank or the central bank). Securities are transferred by book-entry, such transfer being final at the instant the entries are made on the securities settlement system's books. The corresponding funds transfers are irrevocable, but not final. During the processing cycle, the system calculates running balances of funds debits and credits, the balance being settled at the end of the processing cycle when the net debit and net credit positions are posted on the books of the commercial bank or central bank that maintains the funds accounts. Settlement of funds accounts may occur once a day or several times a day.

Model 3 - Simultaneous Net Settlement of Securities and Funds Transfers. These systems settle transfer instructions for both securities and funds on a net basis, with final transfer of both occurring at the end of the processing cycle. Settlement may occur once a day or several times a day. The securities settlement system maintains securities accounts for participants. Funds accounts may be maintained by another entity, either a commercial bank or the central bank.

During a processing cycle, running balances of debits and credits to funds and securities accounts are calculated. All funds and securities transfers are provisional until the end of the processing cycle, at which time book-entry transfer of securities take place. If and only if all participants have sufficient balances of funds and securities, final transfers of the net securities balances and net funds balances are executed.

49. Are the cash and security movements simultaneous?

Yes

OWNERSHIP OF SECURITIES

The purpose of this section is to determine how ownership of securities is represented, the ways the depository maintains ownership or control of securities held in the depository, and the extent to which ownership of assets held by the depository is separated from the proprietary assets of the depository.

This section also considers the process by which the ownership of securities is transferred in the depository and the existence of any liens or claims on the depository securities (such as a clearing lien) that would affect the ownership of depository securities.

50. How are depository eligible securities held by the depository?

Securities in the depository are held in certificated form.

51. If depository eligible securities are certificated, can depository eligible securities be held outside of the depository?

All eligible securities must be held in the depository. (please answer 51b)

51b. If depository eligible securities are required to be centrally immobilized at the depository, where and with whom are the certificates safekept? (then please answer 51c)

The certificates are kept in Bursa Malaysia Depository Sdn Bhd's vault.

51c. Are these certificates:

Registered (please answer 51d)

51d. If registered, how are the depository eligible securities registered?

In the name of a separate nominee of the depository. (please answer 51f)

51f. If in the name of a separate nominee, please identify by name the nominee used:

Bursa Malaysia Depository Nominees Sdn Bhd

52. If securities are dematerialized:

Not applicable

52d. If the securities held by the depository are recorded by book entry at the registrar, are the securities registered only to the

depository, with the depository providing the function of recording ownership on a centralized basis for the market? (Choose all that apply.)

Yes (please answer 52e)

52e. If yes, how are securities held at the registrar for the account of the depository? (Choose one.)

In the name of a separate nominee of the depository

52i. If the securities held with the depository are recorded by book-entry at the registrar, what are the control features at the registrar for transfer of registrar positions to and from the depository (e.g., authentication procedures, reconciliation, confirmation of position at registrar)? Please describe:
