

# ChiNext Index Methodology

February 2019

ChiNext Index is designed to reflect performance of the ChiNext Market of Shenzhen Stock Exchange, and to provide a benchmark and investment instrument for China's innovative and venture enterprises.

## 1. Code and Name

Index Name: ChiNext Index

Short Name: ChiNext

Index Code: 399006

Index Name: ChiNext Total Return Index

Short Name: ChiNext TRI

Index Code: 399606

## 2. Base Date and Base Point

Base Date: May 31, 2010

Base Point: 1000

### **3. Index Universe**

All A shares listed on the ChiNext Market of Shenzhen Stock Exchange satisfying the following criteria:

- 3.1 Not labelled as ‘special treatment’ (ST, \*ST);
- 3.2 Listed for more than 6 months, with the exception of ranking in the top 1% of Shenzhen market by A share total market cap;
- 3.3 No major violations in laws and regulations, and no major problems in financial reports in the latest year;
- 3.4 No abnormal operation or substantial losses in the latest year;
- 3.5 No abnormal fluctuation in stock price during the review period.

### **4. Selection Criteria**

Original constituents of ChiNext Index included all ChiNext stocks in Shenzhen Composite Index on the launch date of June 1, 2010.

Before the number of constituents reached 100, all newly listed stocks on the ChiNext Market were included on the 11th trading day.

When the number of constituents reached 100, it was fixed at 100.

Index constituents are selected from the index universe as follows:

Calculate the A share daily average total market cap and A share daily average trading value within the latest 6 months in the index universe;

Rank the stocks by A share daily average trading value indescending order and remove bottom 10% stocks;

Rank remaining stocks by A share daily average total market cap in descending order and select top 100 stocks as index constituents.

In case of similar rankings, stocks with strong industry representativeness and good financial performance are preferred.

## **5. Index Calculation**

ChiNext Index is calculated according to the Paasche weighted method, the real-time calculation is carried out daily according to the following formula:

real time index

= last trading day closing index

$$\times \frac{\sum (\text{constituents' real time stock price} \times \text{No. of shares})}{\sum (\text{constituents' last trading day closing price} \times \text{No. of shares})}$$

**Constituents:** stocks included in index calculation.

**No. of shares:** free-float shares of constituents, shares of the numerator and denominator are the same.

**Free-float shares:** the actual number of tradable shares of a listed company, which is the number of non-restricted shares after excluding ‘the non-restricted shares held by the following three types of shareholders and the shareholders acting in concert with a shareholding ratio of more than 5%’: ①state-owned (legal entities) shareholders; ②strategic investors; ③company founders, families or senior executives.

**Free-float market cap:** stock price times free-float shares.

**Numerator:** the sum of constituents’ real-time free-float market cap.

**Denominator:** the sum of constituents’ last trading day closing free-float market cap.

**Stock price selection:** opening prices of constituents in call auction are used to calculate the opening index, real-time trading prices are used to calculate the real-time index, and closing prices are used to calculate the closing index. If there is no transaction on that day, the closing price of the previous trading day shall be taken. If a constituent is suspended, its latest transaction price shall be taken.

## **6. Periodic Review**

### **6.1 Review Period**

The index is reviewed semi-annually. Review in May is based on trading and fundamental data from November 1 of the previous year to April 30; review in November is based on trading and fundamental data from May 1 to October 31.

## **6.2 Implementation Date**

Periodic reviews are implemented on the next trading day after market closing of the second Friday in June and December each year. Announcements of periodic reviews are published two weeks before implementation.

## **6.3 Number of New Constituents**

The number of new constituents in each periodic review shall not exceed 10% of the total number of index constituents.

## **6.4 Buffer Zone**

New candidate stocks ranking top 70% of the total number of index constituents are selected in order, existing constituents ranking top 130% are remained in the index with priority.

## **6.5 Reserved Stocks**

After new constituents are determined, remaining stocks will be ranked by daily average total market cap in descending order and 5% of the total number of index constituents will be selected as reserved constituents.

## **7. Non-periodic Review**

### **7.1 Fast Entry Rules**

For a newly issued stock ranking top 10 in Shenzhen market by average daily total market cap for the first 5 trading days, it will be added into the index on the 15th trading day to replace the existing constituent with the smallest average A share total market cap.

For a listed company ranking top 10 in Shenzhen market by the average A share total market cap<sup>0</sup> due to M&A and other corporate actions, the same rules shall be applied.

### **7.2 Merger and Acquisition**

Constituent companies merge: the stock of the resulting company will remain as a constituent. The vacancy will be filled by the highest

ranked reserved stock.

A constituent company acquires a non-constituent company: the stock of the resulting company will remain as a constituent.

A non-constituent company acquires a constituent company: the stock of the resulting company becomes index constituent if it ranks above all reserved stocks, otherwise the vacancy will be filled by the highest ranked reserved stock.

### **7.3 Splits**

When a constituent company splits into two or more companies, a vacancy will be created. Whether resulting companies will be included as index constituents depends on their ranking.

If every resulting company ranks above the lowest constituent, then all resulting companies will be added to the index, and the lowest constituent(s) will be removed to keep the number of index constituents constant.

If every resulting company ranks below the lowest ranked constituent but some of them rank above all reserved stocks, then highest ranked resulting companies will be added to the index.

If every resulting company ranks below the lowest ranked constituent and the highest ranked reserved stock, then the highest ranked reserved stock will be added to the index.

#### **7.4 Suspension of Listing and Delisting**

If a constituent is subject to suspension of listing, it will be replaced by the highest ranked reserved stock from the day of suspension.

If a constituent is subject to delisting, it will be replaced by the highest ranked reserved stock from the first trading day of its delisting preparing period.

If a constituent is subject to probability of suspension of listing or delisting due to substantial violations in regulation (such as fraud of financial reports), it will be replaced by the highest ranked reserved stock with permission of the Index Advisory Committee.

#### **7.5 Risk Alert**

A constituent subject to risk alert (ST or \*ST) by the exchange will be removed on the next trading day of the second Friday of the month following the implementation of risk alert, the highest ranked

reserved stock shall be included.

## **8. Reserved Stocks**

The reserved stock list will be created for non-periodic adjustments during the periodic review.

Constituents subject to listing suspension or delisting will be replaced by the highest ranked reserved stocks.

Number of reserved stocks is set to cover 5% of the total number of index constituents. Reserved stocks list will be refilled and announced in time when the number of reserved stocks is less than 50%.

## **9. Adjustment for Index Calculation**

### **9.1 Adjustment for Previous Closing Price**

For total return index, the closing price of a constituent on record date will be updated to the reference ex-right price on ex-date when dividend payment, bonus issue, rights issue, capital/surplus reserve issue or other ex-right actions implemented. The reference ex-right price shall be referred to Shenzhen Stock Exchange.

For price index, the closing price of a constituent will not be adjusted for cash dividend. Adjustments for other ex-dividend or ex-right actions are the same as those for total return index.

## **9.2 Adjustment for Free-float Shares**

### **9.2.1 Real-time Adjustment**

In the event of bonus issue, capital/surplus reserve issue or rights issue, free-float shares of constituents shall be adjusted on ex-date.

In the event of secondary offering or rights issue, free-float shares of constituents shall be adjusted on the listing date of new shares.

In the event of debt-equity conversion, shares repurchase or exercise of warrants, free-float shares of constituents shall be adjusted on the next trading day of the announcement.

### **9.2.2 Periodic Adjustment**

Changes of free-float shares caused by non-corporate actions such as increase/decrease of major shareholders' holdings and listing of restricted shares shall be adjusted on the next trading day of the second Friday of June and December, according to the holding data from latest periodic and non-periodic reports.

## **10. Index Dissemination and Management**

### **10.1 Index Dissemination**

ChiNext Index shall be disseminated through the following channels:

Real-time quotes shall be disseminated via the Shenzhen Stock Exchange information release system and Internet access service of quotes;

Quotes shall be daily disseminated via data transmission channels such as SSCC and FTP;

Quotes shall be daily disseminated to the public via CNI's website ([www.cnindex.com.cn](http://www.cnindex.com.cn)).

### **10.2 Management of ChiNext Index**

ChiNext Index is compiled, maintained and operated by Shenzhen Securities Information Company Limited ('SSIC'), delegated and authorized by Shenzhen Stock Exchange. The index department of SSIC periodically reviews constituents' representativeness and determines whether to change any constituent according to the

---

review.

ChiNext Index is an asset owned by Shenzhen Stock Exchange. Without written authorization of Shenzhen Stock Exchange or SSIC, no institution or individual shall track or trade the index, or use the index as an evaluation benchmark.
